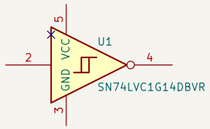
SN74LVC1G14DBVR — STOCK CONTACT-MAP FIXTURE

Texas Instruments SCES218AA, October2025; DBV0005A top view:1NC,2A,3GND,4Y,5VCC.
Stock symbol and hand-solder footprint; no custom library. Pin1 has no internal connection.



DBV / SOT-23-5, hand-solder stock lands.
Pin1 NC flag is datasheet-authorized.
Four functional pins remain genuinely unwired;
this package fixture is not a functioning circuit.

GENERIC LAND DEVIATION: pads1.56×0.65mm at X±1.35; TI example1.10×0.60 at±1.30.
Stock courtyardY±1.8 leaves only0.025mm to maximum mold-flash envelope.
Later layout MUST reserve Yhalf>=2.025mm for full flash plus0.25mm clearance.
Development contact mapping only; assembly, mask/stencil and circuit qualification remain open.
